

5.11 1) Le terme général de la série s'écrit $\frac{1}{k(k+1)}$.

$$2) \frac{1}{k} - \frac{1}{k+1} = \frac{(k+1) - k}{k(k+1)} = \frac{1}{k(k+1)}$$

$$\begin{aligned} 3) \quad s_n &= \sum_{k=1}^n \frac{1}{k(k+1)} = \sum_{k=1}^n \frac{1}{k} - \frac{1}{k+1} \\ &= \underbrace{\frac{1}{1} - \frac{1}{2}}_{k=1} + \underbrace{\frac{1}{2} - \frac{1}{3}}_{k=2} + \underbrace{\frac{1}{3} - \frac{1}{4}}_{k=3} + \dots + \underbrace{\frac{1}{n} - \frac{1}{n+1}}_{k=n} = 1 - \frac{1}{n+1} \end{aligned}$$

$$4) \quad S = \lim_{n \rightarrow +\infty} s_n = \lim_{n \rightarrow +\infty} 1 - \frac{1}{n+1} = 1 - \lim_{n \rightarrow +\infty} \frac{1}{n+1} = 1 - 0 = 1$$
